Audit Opinion

“We have carried out an audit of the annual report, including the accounts and Management Report of GEHE AG, which is combined with the group Management Report for the business year from 1 January until 31 December 2000. Maintenance of the accounts and the drawing up of the annual report and Management Report in accordance with the German commercial regulations is the responsibility of the company’s Management Board. It is our task, based upon the audit carried out by us, to give an assessment of the financial statements, including the accounts and the combined Management Report.

We have carried out our audit in accordance with § 317 of the German Commercial Code (Handelsgesetzbuch) in compliance with the German guidelines laid down by the German Institute of Certified Public Accountants (IDW). According to these guidelines, the audit must be planned and carried out so that errors and infringements having a significant effect on the representation of the assets, financial situation and profits presented by the annual report, taking account of the principles of proper book-keeping, and by the Management Report can be recognised with sufficient certainty. When determining the audit procedures, knowledge of the business activities and of the economic and legal background of the company and of expectations concerning possible errors are taken into account. During the audit, the effectiveness of the internal reporting monitoring system and evidence for the details given in the accounts, the financial statements and the Management Report are assessed largely on the basis of random samples. The audit includes assessment of the accounting principles applied, of significant estimates made by the Management Board and an appraisal of the overall picture presented by the financial statements and the combined Management Report. We are of the opinion that this audit constitutes a sufficient basis for our assessment.

Our audit has not led to any objections.

We are convinced that the financial statements which comply to the principles of proper accounting, give a true and fair view of the assets, the financial situation and profits of the company. The combined Management Report gives an accurate representation of the company's situation and the risks entailed in its future development."
